7000 PNEUMATIC TOOL OILS

"Engineered specifically for the unique Air Tool and Rock Drill Industry."

DESCRIPTION:

Steelco Pneumatic Tool Oils are made from specially selected paraffinic base oil stocks. Included in the additive system are powerful rust, oxidation and corrosion inhibitors to supplement the natural ability of the fine base oils to reduce wear, galling, welding and to control the formation of rust and corrosion. Additional additives impart dispersancy, oil mist suppression and smoke depression. A special oiliness or lubricity additive, along with a cushioning additive, enables this exceptional lubricant to coat all metal surfaces and give maximum protection in use as well as in storage.

Nomenclature:

- 7010 Air Tool Oil
- 7030 Rock Drill Oil
- 7050 Rock Drill Oil

USERS BENEFITS:

Designed especially for air-line or reservoir lubrication of both rotary and percussive pneumatic equipment systems, such as:

- Hand operated or self propelled rock drills
- Jack hammers, chippers, clay spades, pavement breakers, tampers
- Drills, grinders, wrenches, pumps, motors, and other vane or piston actuated tools, jigs and fixtures
- Other associated pneumatic equipment

APPLICATIONS:

- * LESS GALLING
- * LESS WELDING
- * LONGER TOOL LIFE
- * NON FOAMING
- * REDUCED CORROSION
- * LESS VIBRATION
- * ADDED LUBRICITY
- * ADHESION ADDITIVE
- * EXCELLENT WATER SEPARATION

TYPICAL TEST DATA:

STEELCO CODE NO.	7010	7030	7050
SAE Grade	10	30	50
Vis. SUS at 100°F	175	590	1000
Viscosity Index	95	95	95
API Gravity	29.0	28.5	27.5
Flash Point, °F	405	450	480
Pour Point, °F	0	5	10
Color	Red	Red	Red
